

Your AI Readiness Results

Overall AI Readiness Score

Your organisation has established some AI foundations but needs to strengthen core capabilities. Prioritise developing your AI strategy, improving data quality, and building technical expertise.

Detailed Assessment Breakdown

Business Alignment & Strategy 60% Advancing

Basic AI strategy with general goals. Priority: Refine strategy with specific, measurable objectives.

Data Quality & Access 47% Developing

Some data quality problems affecting reliability. Priority: Implement data governance and quality improvement processes.

Technical Infrastructure 47% Developing

Basic cloud setup with minimal AI optimisation. Priority: Upgrade infrastructure to support AI applications.

Talent & Skills 53% Developing

10-25% have some AI knowledge. Priority: Expand AI education and consider external partnerships.

Financial & Resource Commitment 20% Emerging

Less than 5% or no dedicated AI budget. Priority: Secure initial AI investment and pilot project funding.

Responsible AI, Ethics & Governance 47% Developing

Basic awareness of AI ethics issues. Priority: Develop formal AI ethics principles and review processes.

Strategic Recommendations

Based on your assessment results, we recommend focusing on these priority areas:

- 1 Financial & Resource Commitment:** Secure initial AI investment and pilot project funding.
- 2 Data Quality & Access:** Implement data governance and quality improvement processes.
- 3 Technical Infrastructure:** Upgrade infrastructure to support AI applications.
- 4 Responsible AI, Ethics & Governance:** Develop formal AI ethic's and principals and review processes.
